# Synthetic Multimerizing Agents
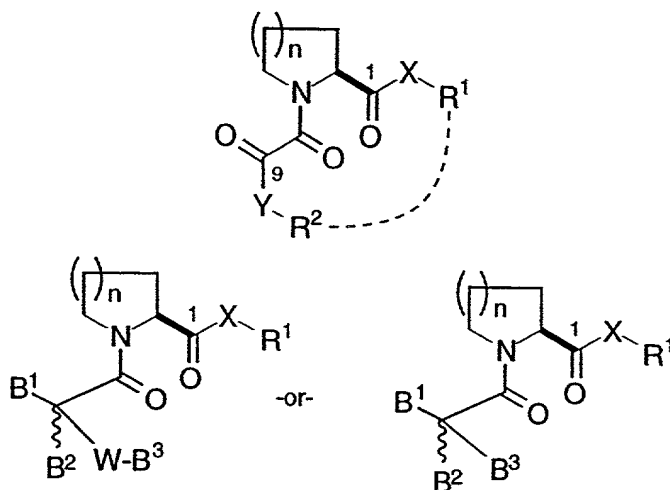

Abstract

5

New compounds are disclosed for multimerizing immunophilins and proteins containing immunophilin or immunophilin-related domains. The compounds are of the formula

$$M^1\text{-}L\text{-}M^2$$

10 where M^1 and M^2 are independently moieties of the formula:

in which B^1, B^2, B^3, R^1, R^2, n, W, X and Y are as defined.
